Github | Portfolio

SDET / QA Automation Engineer with 5+ years of experience in software quality assurance, web application testing, API testing, and test automation.

Work & Experience

Quality Assurance Intern

Jun 2024 – Jan 2025

Interview Buddies, California

- Tested an AI-assisted mock interview platform and validated application functionality and product features.
- Developed Python unit tests for the platform.
- Created integration and feature test plans and test cases for the AI Resume Review feature.
- Evaluated Gemini and ChatGPT APIs for AI-powered product features.

Senior Quality Assurance Engineer

Apr 2021 – May 2024

Insperon Infosys and Technologies, Kathmandu, Nepal

- Designed test plans, scenarios, and test cases for functional, regression, and integration testing.
- Performed REST API testing and validation using Postman.
- Identified, documented, tracked, and escalated software defects using Jira.
- Used Git and GitHub for version control and collaboration.
- Worked with Python-based testing and automation workflows.

Quality Assurance Analyst

Apr 2019 – Mar 2021

SoftMahal Technologies Pvt. Ltd., Kathmandu, Nepal

- Performed functional, regression, and release validation testing for software applications.
- Conducted bug triage and tracked defects using Jira.
- Collaborated with developers and release leads to reproduce and resolve software issues.
- Worked with Python and JavaScript test scripts.
- Performed API testing using Postman.

Expertise and Skills

Test Automation: Python, Playwright, Pytest, Page Object Model, Data-Driven Testing, Cross-Browser Testing

Testing: Automation Testing, Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Integration Testing, API Testing, Web Application Testing

Programming: Python, JavaScript, SQL, HTML, CSS

API Testing: Postman, REST API Testing, Request/Response Validation, Status Code Validation

Tools & CI/CD: Git, GitHub, GitHub Actions, Jira, Confluence

AI Testing: AI-Assisted Application Testing, LLM Output Validation, Structured Output Validation, Guardrail Testing

Projects	<i>Playwright Test Automation Framework</i>	GitHub
	• Built a reusable web UI automation framework using Python, Playwright, and Pytest. • Implemented Page Object Model architecture and cross-browser testing across Chromium, Firefox, and WebKit. • Added smoke and regression suites, data-driven testing, automated screenshots, and HTML reports. • Integrated GitHub Actions CI/CD with browser matrix execution and environment-based credential handling.	
	<i>PawPal+ – AI Pet Care Scheduler</i>	GitHub
	• Built an AI-assisted application that converts natural-language requests into structured scheduling tasks. • Implemented Pydantic validation and medical-language safety guardrails. • Developed schedule sorting, conflict detection, and fallback parsing. • Created reliability tests for AI parsing and guardrail behavior.	
Certifications	Foundations of AI Engineering	Summer 2026
	<i>CodePath</i>	
	Intro to Web Development	Summer 2026
	<i>CodePath</i>	
Education	Bachelor of Engineering in Information Technology	Apr 2019
	Pokhara University, Nepal	
	<i>Relevant Coursework:</i> Object-Oriented Programming in C++ and Java, Data Structures and Algorithms, Operating Systems, Computer Organization and Architecture
